

2019 SBUR
ANNUAL MEETING
November 7-10, 2019

NOVEL DISCOVERIES IN UROLOGY:
BIG DATA TO MICROBIOME

New Orleans Downtown Marriott at the Convention Center
859 Convention Center Boulevard, New Orleans, LA

 **SBUR**
SOCIETY FOR BASIC UROLOGIC RESEARCH, INC.

The Society for Basic Urologic Research (SBUR) was formed in 1986 and is the pre-eminent US-based urologic research society. Our members include molecular and developmental biologists, oncologists, immunologists, epidemiologists, andrologists, biochemists, bioinformaticians, and clinical urologic surgeon-scientists from academia, industry and government. SBUR scientists' expertise includes the study of urologic cancers (prostate, bladder, kidney, testis, penis), the biology of benign diseases of the prostate, bladder and kidney, developmental biology, kidney and bladder function, autoimmune urologic diseases, infectious diseases, neurourologic diseases, male reproductive biology, infertility and erectile dysfunction.

Our members are based around the globe, including in the United States, Europe and Asia. The active membership of SBUR includes 234 PhDs, 145 MDs, 39 MD/PhDs and 52 other Researchers.

The SBUR 2019 Annual Meeting entitled, "Novel Discoveries in Urology: Big Data to Microbiome" provides a unique environment to learn about the most recent advances in basic, translational and preclinical urologic research, in addition to providing a dynamic forum for discussing how these advances could be implemented for the prevention and treatment of urological diseases.

Much has been learned over the last decade regarding the molecular determinants and key pathways that regulate normal and disease processes, and a wide variety of novel therapeutic and diagnostic strategies have emerged as a result. Thus, this year's meeting will focus on a few areas that are emerging as the cutting-edge advances in urology, including:

- 1) Big data (genome, transcriptome, proteome, and metabolome) analysis that is driving the personalized and precision medicine initiative;
- 2) Endocrine and metabolic dysfunctions that have not been well studied in urologic diseases;
- 3) Immunology and immunotherapy that urology is lagging behind other fields;
- 4) Benign urologic disease that is the focus of several NIDDK-funded O'Brien centers and P20 programs;
- 5) Innovative technologies that have emerged in urologic research; and,
- 6) Microbiome and inflammation that are pushing forward our knowledge to a new level.

Following completion of these educational programs, participants will know and be able to:

- Examine recent findings in studying the basic mechanisms of urologic diseases in the areas of transcriptome, genome and epigenome, metabolism, immunology, microbiome, therapeutics, and diagnostic/prognostic markers.
- Identify critical knowledge gaps and stimulate approaches to address them.
- Disseminate and facilitate novel discoveries in urologic diseases.
- Explain the cutting-edge advances in urological cancer therapeutics including mechanisms of resistance and novel approaches in overcoming resistance.
- Describe the outcomes of recent clinical trials on potential new drugs.
- Compare and discuss emerging clinical biomarkers for prostate cancer detection.
- Identify the new tools in analysis of big data generated from omics studies.
- Demonstrate the potential new targets in urological cancers.
- Discuss the novel technologies in urologic research.
- Update cancer immunology and immunotherapy in urological cancer field.
- Assess the role of microbiome and inflammatory microenvironment in malignant urologic diseases.
- Describe leukocytic phenotypes in BPH and how they contribute to disease progression.
- Recognize the importance of basic research in benign urologic disease.
- Recognize how therapeutic intervention targeted to the epigenetics might be useful for the treatment of urological cancer.
- List tools essential for the successful training of young investigators for careers in urologic diseases and cancer.

FRIDAY, NOVEMBER 8, 2019

Plenary Session I: Big Data as Engines for Discovery

8:00 a.m. - 12:00 p.m.

Discussion Leaders

Chang-Deng Hu, MD, PhD
*Purdue University
West Lafayette, IN*

Jindan Yu, PhD
*Northwestern University
Chicago, IL*

8:00 - 8:20 a.m. UALCAN: an Integrated Data Mining Platform for Comprehensive Analysis of Cancer Transcriptome and Novel Target Discovery

Sooryanarayana Varambally, PhD
*University of Alabama-Birmingham
Birmingham, AL*

8:20 - 8:30 a.m. Discussion

8:30 - 8:50 a.m. Molecular Subtypes Chase in Bladder Cancer

Vinata B. Lokeshwar, PhD
*Augusta University
Augusta, GA*

8:50 - 9:00 a.m. Discussion

9:00 - 9:20 a.m. The Role of miR-21 in Prostate Cancer Development and Progression

Shawn E. Lupold, PhD
*Johns Hopkins Hospital
Baltimore, MD*

9:20 - 9:30 a.m. Discussion

9:30 - 9:40 a.m. Travel Award Presentation #1: PRMT5 as a Novel Target for the Treatment of Castration-resistant Prostate Cancer

Elena Beketova
*Purdue University
West Lafayette, IN*

9:40 - 9:45 a.m. Discussion

9:45 - 10:00 a.m. Break

10:00 - 10:20 a.m. Epigenetic Landscape Reveals Druggable Driver Genes for Tumorigenesis

Kaifu Chen, PhD
*Houston Methodist
Houston, TX*

10:20 - 10:30 a.m. Discussion

10:30 - 10:40 a.m. Travel Award Presentation #2: N-Myc-mediated Epigenetic Reprogramming Drives Lineage Plasticity in Advanced Prostate Cancer

Nicholas Brady, PhD
*Weill Cornell Medicine
New York, NY*

10:40 - 10:45 a.m. Discussion

10:45 - 11:05 a.m. Probing the Transcriptional Landscape of the Bladder Following Spinal Cord Injury

Rosalyn Adam, PhD
*SBUR Vice President
Boston Children's Hospital and
Harvard Medical School
Boston, MA*

11:05 - 11:15 a.m. Discussion

11:15 - 11:35 a.m. Epigenomic Approaches to Discover Transcriptional Vulnerabilities of Prostate Cancer

Qianben Wang, PhD
*Duke University
Durham, NC*

11:35 - 11:45 a.m. Discussion

11:45 - 11:55 a.m. Travel Award Presentation #3: Site Specific DNA Methylation Silences Forkhead Box A1 Expression in Advanced Bladder Cancer

Jenna M. Buckwalter, PhD
*Penn State College of Medicine
Hershey, PA*

11:55 - 12:00 p.m. Discussion

12:00 - 1:30 p.m. Lunch

Plenary Session II: Targeting Endocrine and Metabolic Dysfunctions

1:30 - 5:15 p.m.

Discussion Leaders

Gail S. Prins, PhD
